

Guidelines for Polka Dot Honey moons

Have you been on an amazing trip lately? Have a favourite place? A travel tip to share?

Polka Dot Bride is looking for submissions that explore the world - literally! We believe in the art of planning a wonderful honeymoon and we want to give the inside scoop to those looking for their dream holiday!

Tel us about your favourite place in the world, your own honeymoon, your favourite travel memories, and travel tips and stories! Share your holiday snapshots and odd moments; we'll live vicariously through your stories until we can plan our own!

Share your travel stories here!

Contributor guidelines for Polka Dot Honey moons:

- Posts must be no longer than 750 words.
- Link all vendors mentioned in your post, or provide a web address we can link to. It's the fair thing to do, after all.
- Only submit images that are your own, or that you have been granted permission to use. No exceptions, ever!
- Keep your voice in your words! We want to get to know you, so let your personality shine through in your writing.

Also, please note:

- A link to your website (if you have one) will be provided in your by-line or profile.
- Your content may be edited for grammar, spelling corrections or to fix links. Ms Polka Dot wants you to look your best when your contribution is published.

Polka Dot Bride will not:

- Republish content that has been published elsewhere (some exceptions can be made when content is published on your own blog). Originality is the key – this is Ms Polka Dot we’re dealing with here!
- Hide your link behind a text link (i.e. “Wedding dresses” links to “www.Your Wedding Dress shop.com”). If your contribution is posted, you will get your name up in lights!
-
- Accept contributions that have monetizing tags or affiliate links embedded in them without Ms Polka Dot’s express permission. It’s just not cool.
- Publish any posts, which are considered inflammatory, racist, or negative/damaging in any way. Ms Polka Dot wants this to be a happy place for everyone who visits!
